

CONTENTS

<i>Academician B. E. Paton's Address</i>	IX
<i>Foreword</i>	X
<i>Makhnenko V. I.</i> Prospects of mathematical modelling and information technologies in welding and allied processes	3
<i>HEAT SOURCES, HYDRODYNAMICS, FORMATION OF JOINTS</i>	
<i>Pokhodnya I. K.</i> Mathematical modelling of metal–gas interaction processes in arc welding	15
<i>Zhang W., Debroy T.</i> Modelling of solidified free surface profile during GMA welding	24
<i>Kovalenko D. V., Yushchenko K. A., Kovalenko I. V.</i> Force effect of the arc in TIG and A-TIG welding of metal	31
<i>Krivtsun I. V.</i> Modelling of combined laser + plasma processes for materials treatment and devices for their implementation	37
<i>Serenko V. A., Zusin V. Ya., Serenko A. N.</i> Mathematical modelling of pore formation in welding	51
<i>Yushchenko K. A., Yarovitsyn A. V., Kalina P. P.</i> Study of heat balance in plasma-powder cladding	56
<i>Pavlyk V., Dilthey U.</i> Modelling fluid flow and solidification structure during GTA welding	61
<i>Zhadkevich M. L., Shevtsov V. L., Palti A. M.</i> Heat generation during the electroslog process	69
<i>Markashova L. I., Grigorenko G. M., Arsenyuk V. V.</i> Physical principles of formation of joints in pressure joining	72
<i>Makhnenko V. I., Pivtorak N. I., Seyffarth P., Jasnau U.</i> Mathematical modelling of the process of formation of joints in butt welding of plates of foam material	80
<i>MICROSTRUCTURE AND PROPERTIES</i>	
<i>Kotowski J., Michailov V., Wohlfahrt H.</i> Calculation of microstructure evolution in 6082-T6 welds for residual stresses and distortion simulation	87
<i>Röhrs K., Michailov V., Wohlfahrt H.</i> Microstructural behaviour of steels for typical welding thermal cycles	92
<i>Muzhichenko A. F.</i> Software and databases of CCT diagrams for prediction of microstructure and mechanical properties of HAZ metal in welding of structural steels	99
<i>Seyffarth P., Kasatkin O. G.</i> Calculation models for evaluating mechanical properties of HAZ metal in welding low-alloyed steels	103
<i>Markashova L. I., Arsenyuk V. V., Grigorenko G. M., Berdnikova E. N.</i> Criterion for evaluation of mechanical properties of joints in dissimilar metals	107
<i>Piekarska W.</i> Mathematical modelling of HAZ metal structure during laser welding	114
<i>Gaude-Fugarolas D.</i> Phase transformations in steel during induction hardening	118
<i>STRESSES AND STRAINS IN WELDED JOINTS</i>	
<i>Yushchenko K. A., Savchenko V. S., Chervyakov N. O., Velikoivanenko E. A.</i> Investigation of peculiarities of deformation processes in welding nickel alloys of a limited weldability	127

<i>Bokota A., Piekarska W.</i> Numerical analysis of stress states in laser welded joints	131
<i>Kvasnitsky V. F., Ermolaev G. V., Labartkava A. V., Prokhorenko V. M.</i> Computer modelling of fields of inherent stresses in joining dissimilar materials and their experimental investigation	136
<i>Nezhivlyak A. E., Aksyonov Yu. N., Grechneva M. V., Matkhanov V. N.</i> Finite element analysis of kinetics of temperature fields and distortions in heat treatment of connection beam	140
<i>Ossenbrink R., Michailov V., Wohlfahrt H.</i> Numerical simulation of welding stresses and distortions in consideration of temporal and local changes of strain rate	144
<i>Makhnenko O. V., Seyffarth P.</i> Prediction of total strains in laser welded beams	149
<i>Knysh V. V.</i> Modelling of the process of retardation of a fatigue crack using artificially induced compressive residual stresses	155
<i>Junek L., Slováček M., Prantl A.</i> Thermal and stress analysis of fusion welding process incorporating microstructure effect	161
PROBLEMS OF WELDABILITY	
<i>Lebedev Yu. M.</i> Calculation of conditions ensuring weldability of low-alloy hardening steels	171
<i>Maksimov S. Yu., Korolyova T. V., Lavrinets I. G.</i> Peculiarities of transport of hydrogen in underwater fusion welding of structural steels	176
<i>Stadtaus M., Michailov V., Wohlfahrt H.</i> Numerical calculation of the main factors on cold cracking	184
INTEGRATED SYSTEMS, PROBLEMS OF OPTIMIZATION	
<i>Makhnenko V. I., Saprykina G. Yu.</i> Application of mathematical modelling to study characteristic phenomena occurring in fusion welding (surfacing) of different steels	193
<i>Dilthey U., Dikshev I., Mokrov O., Pavlyk V.</i> Process modelling and software tools for MAG/MIG welding	201
<i>Lavrinets I. G., Korolyeva T. V.</i> Computation system for prediction of properties of different zones of welded joints in arc welding of structural steels	210
<i>Seyffarth P., Makhnenko O. V., Velikoivanenko E. A.</i> Optimisation of the technology of surfacing large sheets	222
<i>Makhnenko O. V., Velikoivanenko E. A., Seyffarth P., Sharf A., Bautzman K.</i> Mathematical modelling of the process of tube-to-tube plate welding	229
<i>Makhnenko O. V., Velikoivanenko E. A., Rozyinka G. F., Seyffarth P., Sharf A.</i> Mathematical modelling of multipass circumferential arc welding of thick-walled shells	231
<i>Melyukov V. V., Khomyakov D. V.</i> Optimisation of thermal parameters of materials treatment using concentrated energy flows	235
<i>Lobanov L. M., Pivtorak V. A., Savitsky V. V.</i> Mathematical model for processing holographic interferograms in non-destructive control of structure elements	239
<i>Semmler U., Alaluss K., Matthes K.-J.</i> Finite element analysis of the PTA welding with applications to hard-facing	243
INFORMATION SYSTEMS	
<i>Demchenko V. F.</i> Information support for welding technologies	251
<i>Musiyachenko A. V.</i> Reference-information system for selection of characteristics of electrodes to be used for mathematical modelling of physical processes	256
<i>Musiyachenko A. V., Shekera V. M.</i> Databank «Mechanical properties of welded joints». Information-retrieval system	261
<i>Index</i>	265
